Alex Example

Product engineer

Example City · alex@example.invalid · Portfolio

Product engineer who makes complicated workflows easier to use. Works across interfaces, services and delivery, with a focus on clear behavior and reliable recovery.

EXPERIENCE

Senior product engineer 2022-present
Example Studio

- Helped operations staff review incoming work in one place, using a typed web interface and a relational task model.
- Made interrupted imports recoverable by separating durable intent from external completion and preserving exact source records.

Software engineer 2019-2022
Sample Works

- Built small services and interfaces for internal teams, from discovery through testing and release.

SELECTED WORK

Clearer decisions from scattered records Selected work
Field Notes - synthetic portfolio example

- Combines attributed Markdown with a generated query index so useful relationships stay easy to find without losing their sources.

SKILLS

Rust, TypeScript, SQL · API design, testing, observability · Product discovery and technical writing

EDUCATION

BSc Computer Science 2016-2019
Example University
